COMPUTER NETWORKING (Z117)

Graduate Certificate Program
College: Engineering

Abstract

The Certificate in Computer Networking will only be available to current ENTS students. It will allow ENTS students to have the option of enhancing their MS degree with specific technical knowledge and also enable them to remain competitive in the marketplace with graduates from similar degree programs at peer institutions.

Financial Assistance

Since the Master's in Telecommunications Program does not normally offer financial support in the form of graduate assistantships, many of our students find assistantships in other units, especially non-academic units, which do not have graduate students.
