The MPH in Behavioral and Community Health is a 45-credit program which includes coursework, an internship, and a MPH project. It takes 2 years to complete as a full-time student and 3.5-5.0 years to complete as a part-time student. The program cannot be completed in less than 2 years due to limited course availability. At this time, the majority of courses are held in-person on the College Park campus, a few are online.
