COMMUNICATION (COMM)

Graduate Degree Program
College: Arts and Humanities

Abstract
The Department of Communication takes as its intellectual focus the strategic use of discourse in the public sphere. Faculty members and graduate students in the Department pursue and produce research that spans a wide range of the Communication discipline, generally focused in three broad curriculum areas:

- Communication Science & Social Cognition,
- Public Relations & Strategic Communication, and
- Rhetoric & Political Culture.

The Department encourages applications for graduate study from students wishing to pursue interests identified within these foci. The graduate program in Communication is designed for students whose educational objective is the Ph.D. degree (currently the program does not admit students whose degree objective is the M.A.). Most graduates of the doctoral program pursue academic careers; however, some work in public policy research and other professions requiring highly developed research skills.

Financial Assistance
Most departmental financial aid is in the form of graduate assistantships. However, a limited number of fellowships are available.
