INTEGRATED TECHNOLOGY IN EDUCATION (Z126)

Graduate Certificate Program
College: Education

ABSTRACT
The Post-Baccalaureate Certificate in Integrated Technology in Education is intended to help educators better incorporate technology into their practice. The curriculum is designed for educators who are currently certified in other content areas and have an interest in developing the pedagogical and theoretical knowledge needed to effectively integrate technology into their professional lives, both within and beyond the classroom. The four-course sequence will prepare educators to incorporate technology into their own teaching practice and assist other educators in utilizing technology to improve the teaching and learning process. This program is intended for teachers across the K-12 spectrum and across disciplines with differing levels of prior technology and computing experience. The courses have been designed to allow participants to customize the coursework to meet the specific needs of their classrooms.
