**LANDSCAPE ARCHITECTURE (LARC)**

Graduate Degree Program  
College: Agriculture and Natural Resources

**Abstract**

The Master of Landscape Architecture (MLA) is a professional degree program that prepares students for work as design professionals in design firms, nonprofits, and governmental agencies. This program has been recognized by the National Center for Education Statistics as a STEM program under the category of 30.3301 - Sustainability Studies. MLA students take a series of lecture and studio design courses, beginning with an introduction to landscape design principles in the first year and culminating in an advanced research and studio design project in the graduating year. The three-year first professional degree curriculum is for students who have a bachelor's degree in a non-design field. The MLA is a degree that is accredited by the LAAB (Landscape Architecture Accreditation Board), which allows graduates to sit for the professional license exam (LARE). The two-year post-professional degree curriculum is for students who have a bachelor's degree in landscape architecture or a related design field.

The University of Maryland’s MLA program is characterized by a balance of theory and practice to address the challenges of stormwater management, climate change, therapeutic landscapes, and environmental justice. Through the required courses, concentration electives, and individual research, each student will acquire a thorough theoretical basis, grounding in methods and practices, and exposure to contemporary local and global issues. The required studio courses and the thesis or creative project, conducted with faculty and community partners, advances the knowledge base of landscape architecture through research and community outreach activities.

Our extensive hands-on training and real-world creative problem-solving approaches provide you the knowledge, skills, and abilities needed to excel and make a difference. The studio experience provides an opportunity to implement ecological design solutions ranging from development, conservation, and restoration. From creating livable communities to solving environmental design problems, Landscape Architects are committed to helping shape the future while protecting the past.

The MLA program is interdisciplinary in its philosophy and its operation. Individual courses convey concepts and tools from diverse disciplines and studio, research, and outreach projects have a multi-discipline association. Project and research advisors come from faculty in Landscape Architecture, Plant Science, Environmental Science, Geography, Geology, American Studies, Architecture, Urban Studies and Planning, Historic Preservation, Real Estate Development, and other academic disciplines and professional partnerships.

The University of Maryland now offers a dual masters program in community planning (MCP) and landscape architecture (MLA) as well as a dual masters program in historic preservation (MHP) and landscape architecture (MLA). For more, please see our Masters of Landscape Architecture (https://larch.umd.edu/graduate/masters-landscape-architecture/) page.

**Financial Assistance**

A limited number of Graduate Assistantships are available to qualified students. These include Teaching, Research, and Administration Assistantships. Assistantships can be 9-month or 12-month appointments and include tuition remission (5 to 10 credits each semester, commensurate with GA appointment), an annual salary, health benefits, and in-state tuition, in exchange for 10 to 20 hours of work per week. Scholarships, fellowships, and other funding sources are available through a variety of external agents, such as the Landscape Architecture Foundation (LAF), the Garden Club of America (GCA), and others, including the following:

For more information on financial assistance and scholarships, please see our Student and Campus Resources (https://larch.umd.edu/student-and-campus-resources/) page.

**Relationships:**  
- Architecture (ARCH) (https://academiccatalog.umd.edu/graduate/programs/architecture-arch/)  
- Community Planning (CMPL) (https://academiccatalog.umd.edu/graduate/programs/community-planning-cmpl/)  
- Historic Preservation (HISP) (https://academiccatalog.umd.edu/graduate/programs/historic-preservation-hisp/)  
- Landscape Architecture and Community Planning (LACP) (https://academiccatalog.umd.edu/graduate/programs/landscape-architecture-community-planning-lACP/)  
- Plant Science (PLSC) (https://academiccatalog.umd.edu/graduate/programs/plant-science-plsc/)

**Admissions**

**General Requirements**

- Statement of Purpose
- Transcript(s)
• TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

**Program-Specific Requirements**

- Letters of Recommendation (3)
- CV/Resume
- Supplementary Application 2
- Portfolio PDF Upload
- Description of Research/Work Experience (optional)

**Portfolio**

The portfolio is a compilation of graphic, written or scored work that you have created or observed and recorded. This collection should show your interest and aptitude for the visual language of design. Expertise in design is welcomed but not required. The portfolio should illustrate your interests in a variety of areas related to landscape architecture and environmental design. This portfolio should be uploaded digitally with your application. If you have any questions please email Diana Cortez at dcortez@umd.edu. **Portfolios are due no later than the application deadline.**

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

**Requirements**

- Landscape Architecture, Master of Landscape Architecture (M.L.A.) (https://academiccatalog.umd.edu/graduate/programs/landscape-architecture-larc/landscape-architecture-mla/)

**Facilities and Special Resources**

The Master of Landscape Architecture Program is located in the Plant Sciences Building on the College Park campus. Advanced individual computing facilities, personal drafting stations, scanning and printing facilities, and a model-making workshop are available 24 hours a day, 7 days a week, to every student in the MLA program.

It provides a strong, comprehensive grounding for landscape design, planning and preservation, landscape assessment, site and ecological systems analysis, plant identification, plant conservation, and plant pathology. Other environmental programs in the College of Agriculture and Natural Resources offer knowledge and practical insight into the science of ecology, ecological restoration, water and soil conservation, and forest management. The MLA builds on this collaboration through advanced courses, student advising, and the contribution of non-teaching programs such as lectures, symposia and research projects.

The Master of Landscape Architecture Program is accredited by the Landscape Architecture Accreditation Board (LAAB) of the American Society of Landscape Architects and meets the educational requirements for licensure in all 50 states and the District of Columbia. The program maintains a balance between design theory and application in a professional degree curriculum. The MLA program builds upon the strengths of the Department of Plant Science and Landscape Architecture (PSLA) and the Landscape Architecture Program (LARC). The PSLA Department is composed of faculty members who specialize in landscape architecture, landscape history, ecology, plant science, urban forestry, turf and golf course management, and landscape management.
