MATERNAL AND CHILD HEALTH (MCHS)

Graduate Degree Program
College: Public Health

Abstract

Maternal and Child Health is an interdisciplinary field in which empirical research, epidemiological data, and policy analyses are used to understand individual, family, community, and sociocultural factors that influence health behaviors, health outcomes, and use of health services by mothers, children, adolescents, and their families (including fathers). The MCH program prepares students to advance research, policy, and practice to improve the health, safety, and well-being of these groups, with a particular emphasis on low income and ethnic minority populations. The program equips students to address MCH issues at both the family and population levels. It is unique in its focus on the whole family system and family health policy.

Ph.D. graduates in MCH are prepared for academic and research positions in colleges and universities; high level administrative or research positions in city/county/state/national health and human service agencies; and leadership positions in nongovernmental and advocacy organizations. MCH graduates are also increasingly hired by private healthcare organizations such as hospitals, HMOs, and health insurers.

Financial Assistance

Fellowships and Graduate Assistantships are available to students admitted into the MCH Ph.D program.

Contact

For additional information, please contact: Dr. Sandra Quinn (MCH Program Director) or Dr. Kevin Roy (Graduate Director).

Admissions

The Department seeks imaginative, intelligent, and highly motivated students with a desire for challenge, a commitment to excellence, and a well-developed sense of social responsibility. Applicants must have a Master's Degree in Public Health or a relevant behavioral or social science discipline. Students with Master's Degrees other than an MPH must complete missing courses (biostatistics, epidemiology) within one academic year of their entry into the program.

We are fortunate to attract gifted students who are concerned about public health, social and ethical issues and who view their future profession in a broad context.

Students are selected on the basis of:

- performance in previous undergraduate and/or graduate coursework
- the strength of GRE scores taken within the last five years
- letters of recommendation
- quality of empirical Master's Thesis (for those with a Master's degree)
- relevant work experience
- professional goals congruent with those of the program

Applicants to the MCH Ph.D. program should have an MPH degree or a social/behavioral science master's degree that focuses on family, maternal, and/or child health issues (including mental health). Students without the MPH degree must complete the required 5 public health core courses (biostatistics, epidemiology, environmental health, health services administration, and social and behavioral sciences) within one academic year of their entry into the program. Applicants should also have a minimum undergraduate GPA of 3.0 and a minimum graduate GPA of 3.0.

Important: Applicants to the Maternal and Child Health Ph.D. program are required to submit two applications for admission. First, they will submit an application to SOPHAS and second, they will submit a separate application to the University of Maryland.

Go to http://www.sophas.org/ to fill out an application to SOPHAS. An application to the SOPHAS system is $120, which will cover all public health programs to which a student chooses to apply. All applicants to the MCH program must submit the following supporting documentation:

- The SOPHAS application form
- Official transcripts from all academic institutions from which you earned credit
- Official GRE test scores, taken within the last 5 years (Institution Code: 0485)
- Three letters of recommendation
- Statement of Purpose and Objectives
- CV/Resume

Approximately one week after application to SOPHAS, applicants will receive an email from the University of Maryland College Park Graduate School with instructions for completing the second supplemental application. They will be directed to the application and a $75 non-refundable fee will be processed when it is submitted. Students submit the following information:
All information required for this application should be submitted on-line and will be sent directly by Graduate Admission to the Department of Family Science for review. No additional hard copies are required.

Standardized test scores (GREs) are to be sent directly from Educational Testing Service (if no category exists on ETS form, please fill in ‘other’ and write FMSC, code 5814). GREs must be taken in time to reach our department before the December 15th deadline. Allow 2 weeks to receive your scores.

### Requirements

- Maternal and Child Health, Doctor of Philosophy (Ph.D.)

### Facilities and Special Resources

Center for Healthy Families: This Center is the training and research arm of the Couple and Family Therapy Program in the Department of Family Science. Departmental graduate students and faculty provide clinical and educational services to families from surrounding communities in this state-of-the-art facility. Master’s and doctoral students use data collected at the Center for research projects.

The University’s close proximity to the nation’s capital, the state capital in Annapolis, federal executive departments, and headquarters of national professional and public interest associations provide research and internship placements for studying family policy unmatched by any other graduate program in the discipline. The Washington-Baltimore metropolitan area offers rich opportunities for research on culturally and socioeconomically diverse families. The campus and department have excellent computer facilities. Students have ready access to the University’s extensive library systems, as well as holdings from the Library of Congress, the National Institutes of Health, National Library of Medicine, National Archives, and many other library collections.
