FACILITIES AND SPECIAL RESOURCES

The STAT Program cooperates closely with the Mathematics Department and the Applied Mathematics, Statistics and Scientific Computation (AMSC) Program. The Program’s faculty are actively involved in research in applied and theoretical areas of statistics and maintain close ties with applied scientists in several federal agencies.

The Program sponsors weekly seminars in Statistics and in Probability. In addition, Research Interaction Teams (RIT’s) cover topics of current statistical interest.

Computing is integrated into the applied courses, and the Program also offers a course “Computational Methods in Statistics”

By scheduling many of its applied and Master’s level courses in late-afternoon time slots, the Program facilitates and invites part-time graduate study.
