

VETERINARY MEDICINE (VMED)

Graduate Degree Program
College: Agriculture and Natural Resources

Abstract

The Virginia-Maryland Regional College of Veterinary Medicine offers a four-year full-time program (curriculum) leading to the Doctor of Veterinary Medicine (D.V.M.) degree. The first three years are taught at Virginia Tech University in Blacksburg, VA in a case-based and traditional lecture/laboratory format. At the end of the first year, students choose a track - small animal, food animal, equine, mixed species and public/corporate veterinary medicine. Considerable flexibility exists for a student to tailor their curriculum to meet individual needs and interests. The senior year (clinical) is 12 months in length. For detailed information on the Doctor of Veterinary Medicine (DVM) program, please visit the Virginia-Maryland Regional College of Veterinary Medicine at: <http://www.vetmed.vt.edu/>
