ANIMAL SCIENCES MAJOR

Program Director: ansc-undergrad-prog@umd.edu

The Department of Animal and Avian Sciences provides a challenging program for academically talented students interested in the application of biology and technology to the care, management and study of domestic and aquatic animals. In addition to emphasizing the traditional farm species of dairy and beef cattle, sheep, swine and poultry, our program includes options for courses in equine science, animal biotechnology, and sciences which prepare students for veterinary or graduate school. Animal sciences majors explore a wide range of subjects - from fundamental biology to animal nutrition, physiology and genetics - while integrating science and economics into animal management. Courses offered by this department may be found under the following acronym: ANSC.

Our department offers B.S., M.S., and Ph.D. degrees. Roughly one-third of our animal sciences seniors enter veterinary school, while others go on to graduate school. Our graduates also pursue a variety of careers such as research technicians, sales or marketing representatives, or animal producers.

Admission to the Major
The Animal Science curriculum for all options is a rigorous and science-based programs. Students receive a solid foundation in basic biological sciences and ANSC courses are largely taught on a comparative basis, where students can then apply the knowledge they gain to a variety of species and situations.

Program Objectives
The Department of Animal and Avian Sciences was formed in 1997 through the merger of the Animal Science, Dairy Science and Poultry Science Departments. Animal science is the study of domesticated animals used for food, fiber, work, biomedical research, and leisure. Our department fulfills a tripartite mission of research, teaching, and extension.

Program Learning Outcomes
Graduates of the ANSC undergraduate program will be able to:

1. Articulate the basic housing, husbandry, dietary, and behavioral needs of the common domestic species.
2. Safely handle horses, sheep, cows, pigs, and chickens.
3. Select, understand, and critically evaluate scientific studies in animal sciences disciplines.
4. Apply animal science knowledge to the creation of animal management programs (husbandry, health, reproduction, nutrition, etc).

REQUIREMENTS
Animal Sciences prepares students for veterinary school, graduate school, and careers in research, sales and marketing, biotechnology, aquaculture, and animal production. The curricula apply the principles of biology and technology to the care, management, and study of dairy and beef cattle, horses, fish, sheep, swine, and poultry. Students complete the Animal Sciences core courses and choose between two broad tracks: Animal Care and Management, for students interested in going directly into a career, or Sciences/Professional Option to prepare for admission to graduate, veterinary, pharmacy, nursing or medical school. Students can customize their program based on their area of interest (emphasis area (https://ansc.umd.edu/undergraduate/prospective-students/)) by selecting courses from that area to fulfill major requirements.

Students pursuing the major should review the academic benchmarks established for this program. See www.4yearplans.umd.edu (http://www.4yearplans.umd.edu) or visit the ANSC Program Requirements (https://ansc.umd.edu/four-year-plans-and-course-requirements/) website. Students will be periodically reviewed to insure they are meeting benchmarks and progressing to the degree. Students who fall behind program benchmarks are subject to special advising requirements and other interventions.

Please note: there is a $50 per course fee for Animal Science Laboratory courses.

All undergraduates majoring in Animal Sciences must complete the following course requirements:

Animal Sciences Major

AREC306    Farm Management and Sustainable Food Production  3
or ANSC270  Animal Enterprise Management
or INAG204  Agricultural Business Management

CHEM231    Organic Chemistry I  3
or PLSC275  Fundamentals of Agricultural and Environmental Chemistry

Advanced ANSC Electives
Select 12 credits of the following:  12

ANSC330    Equine Science
ANSC340    Health Management of Animal Populations
ANSC359    Internship Experience in Animal and Avian Sciences
ANSC410    The Gut Microbiome and its Roles in Health and Disease
ANSC417    Regulatory Issues in Animal Care and Management
ANSC435    Experimental Embryology
ANSC437    Animal Biotechnology
ANSC440    Zoonotic Diseases and Control
ANSC443    Physiology of Lactation
ANSC444    Domestic Animal Endocrinology
ANSC450    Animal Breeding Plans
ANSC452    Avian Physiology
ANSC453    Animal Welfare and Bioethics
ANSC455    Applied Animal Behavior
ANSC460    Comparative Vertebrate Immunology
ANSC497    Animal Biotechnology Recombinant DNA Laboratory

Management Courses
Select 9 credits of the following:  9

ANSC220    Livestock Management
ANSC232    Horse Management
ANSC237    Equine Reproductive Management
ANSC242    Dairy Cattle Management
ANSC250    Companion Animal Care and Management
ANSC255    Introduction to Aquaculture
ANSC260    Laboratory Animal Management
ANSC262    Commercial Poultry Management
ANSC282    Grazing Animal Management

Total Credits  34

Science/Professional & Combined Ag-Veterinary Medicine

Course       Title                                    Credits

Required Courses
ANSC327    Molecular and Quantitative Animal Genetics  3
BCHM463    Biochemistry of Physiology               3-4
or BSCI330  Cell Biology and Physiology
CHEM231    Organic Chemistry I & Organic Chemistry Laboratory I  4
CHEM241    Organic Chemistry II & Organic Chemistry Laboratory II  4
CHEM271    General Chemistry and Energetics & General Bioanalytical Chemistry Laboratory  4
PHYS121    Fundamentals of Physics I
or PHYS131  Fundamentals of Physics for Life Sciences I
PHYS122    Fundamentals of Physics II
or PHYS132  Fundamentals of Physics for Life Sciences II

Advanced ANSC Electives
Plus take 9 credits of the following:  9

ANSC330    Equine Science
ANSC340    Health Management of Animal Populations
ANSC359    Internship Experience in Animal and Avian Sciences
ANSC410    The Gut Microbiome and its Roles in Health and Disease
ANSC417    Regulatory Issues in Animal Care and Management
ANSC435    Experimental Embryology
ANSC437    Animal Biotechnology
ANSC440    Zoonotic Diseases and Control
ANSC443    Physiology of Lactation
ANSC444    Domestic Animal Endocrinology
ANSC446    Physiology of Mammalian Reproduction
ANSC447    Physiology of Mammalian Reproduction Laboratory
ANSC450    Animal Breeding Plans
ANSC452    Avian Physiology
ANSC453    Animal Welfare and Bioethics
ANSC455    Applied Animal Behavior
ANSC460    Comparative Vertebrate Immunology
ANSC497    Animal Biotechnology Recombinant DNA Laboratory

Management Courses
Select 3 credits of the following:  3

ANSC220    Livestock Management
ANSC232    Horse Management
ANSC237    Equine Reproductive Management
ANSC242    Dairy Cattle Management
ANSC250    Companion Animal Care and Management
ANSC255    Introduction to Aquaculture
ANSC260    Laboratory Animal Management
ANSC262    Commercial Poultry Management
ANSC282    Grazing Animal Management

Total Credits  38-39

*A complete listing of all currently approved Management and Advanced ANSC Elective courses is available from our ANSC Course Listing (https://ansc.umd.edu/undergraduate/course-listing/approved-mgmt-and-adv-anpscourses/) page.

Other Requirements for the Major

Animal sciences majors select one of two options to guide their coursework. Program requirements (https://ansc.umd.edu/four-year-plans-and-course-requirements/) for all options are available on our
Animal Sciences Major

website, along with a list of all ANSC courses (https://ansc.umd.edu/undergraduate/current-students/courses/) and when they are offered.

**Animal Care & Management (0104A)** - is designed for students whose career plans include animal management, production and the marketing of animal products. The curriculum provides basic courses in genetics, nutrition, physiology and reproduction while allowing students to focus on the management of one particular livestock species. You will be encouraged to supplement academic work with practical experience by completing an internship. Dairy science students, for example, intern at local farms where they participate in decisions about breeding, feeding, health practices, milk production and other aspects of herd management. This option will prepare you for ownership or management positions with dairy, livestock or poultry production enterprises; positions with marketing and processing organizations; breed associations; and positions in agribusiness fields such as sales of feed, pharmaceutical products and agricultural equipment. Graduates also work with state and federal agencies.

**Science/Professional (0104E)** - Prepares students for admission to veterinary or medical schools and/or graduate school. Graduate school study can open the door to an exciting research career in specialty areas of animal or biological sciences such as genetics, nutrition, physiology or cell biology. The curriculum emphasizes advanced courses in the biological and physical sciences and includes all the pre-veterinary and pre-medicine requirements.

**Combined Ag & Vet Sci (1299D)** - A combined degree program is available to students who gain admission to veterinary school prior to completing their bachelor’s degree. College of Agriculture and Natural Resources students who have completed at least ninety hours, including all college and university requirements, are awarded a bachelor of science degree upon successful completion of at least thirty semester hours in an accredited college of veterinary medicine. Early planning with your advisor is encouraged if you choose this option.

Minimum Grade Policy:

ANSC has a minimum grade policy which states that **ANSC students must earn a "C-" or better in all major required courses, including ANSC courses and required supporting courses in other departments.** Students must also have both a cumulative GPA of at least a 2.0 and a 2.0 cumulative GPA in all major requirements in order to graduate. More information on this policy is available on the ANSC Minimum Grade Policy (https://ansc.umd.edu/undergraduate/current-students/minimum-grade-policy/) page.

**FOUR-YEAR PLAN**

Click here (https://agnr.umd.edu/academics/advising/four-year-plans/) for roadmaps for four-year plans in the College of Agricultural and Natural Resources.

Additional information on developing a four-year academic plan can be found on the following pages:
