University college students. You will examine why environmental change lectures, professional presentations, and group work with Beijing Normal to learn about the country's sustainability initiatives through field visits, actors in this narrative. Join this study abroad program in Beijing, China, resource consumption, the United States and China are the most critical a sustainable future, given their large populations, GDP, and rates of sectors, scales, and regions. Though all countries share a role in ensuring Sustainability is a 21st century buzzword and its definition varies across natural and cultural history.

and GIS, local environmental issues, geomophology and paleohistory, and micrometeorlogical measurements, soils, water quality, remote sensing hydrology measurements, vegetation classification and ordination, the following topics are covers: GPS (global positions system), stream the Potomac River in the mountains of West Virginia. During the camp week field trip (mid-August) with a base camp in the headwaters of Applied introduction to field methods. This class is built around a two Environmental Science GEOG418 Fieldwork Opportunities GEOG430 Beijing, China (Summer): Society and Sustainability Sustainability is a 21st century buzzword and its definition varies across sectors, scales, and regions. Though all countries share a role in ensuring a sustainable future, given their large populations, GDP, and rates of resource consumption, the United States and China are the most critical actors in this narrative. Join this study abroad program in Beijing, China, to learn about the country’s sustainability initiatives through field visits, lectures, professional presentations, and group work with Beijing Normal University college students. You will examine why environmental change is spatially distributed, and how sustainability decisions are made within societies on multiple scales and by multiple cultures. Take this unique opportunity to learn and see the interactions of society and sustainability in China - the country that potentially holds the most peril and promise to a sustainable global future. http://www.geog.umd.edu/content/study-abroad (http://www.geog.umd.edu/content/study-abroad/)

Internships
The Department of Geographical Sciences offers a one-semester internship program for undergraduates. Students can earn a total of three credits. Students are responsible for finding their own internships and can pursue a wide variety of opportunities in the public private and non-profit sectors. Internships may be on- or off-campus, paid or unpaid. http://www.geog.umd.edu/content/internship-program (http://www.geog.umd.edu/content/internship-program/)

Internship Requirements
• Junior or senior with a minimum of 70 credits
• 2.5 GPA overall

Internship Partners
• NASA Develop
• USDA
• Campus GIS - Facilities Management
• NOAA
• ESRI
• START
• Urban Resources Initiative
• The Maryland National Capital Park and Planning Commission

Honors Program
Students admitted to the Honors program engage in independent research under the guidance of an individual faculty member. Students are eligible upon completion of 30 credits of geography courses including the required courses. Honors students will need to register for 12 credits of which they can substitute for formal coursework. Students must have a 3.2 overall GPA and a 3.5 GPA in Geographical Sciences. http://www.geog.umd.edu/content/honors-geography (http://www.geog.umd.edu/content/honors-geography/)

Student Societies and Professional Organizations
Geography Club
Geography Club is back and better than ever! Join undergrads and grad students for cultural potlucks, international movies, charity events and exploratory trips around the DC metropolitan area!

- Contact the Geography Club at geogclubumd@gmail.com for more information.
- https://geog.umd.edu/content/clubs-and-associations (https://geog.umd.edu/content/clubs-and-associations/)

Gamma Theta Upsilon: The Geography Honor Society
GTU is an international honor society in geography that aims to further professional interest in Geography, strengthen student and professional training and encourage student research. Membership is earned through

Advising
Advising is mandatory for students each semester. The advising office is located at 2181 M LeFrak Hall. If you can, please email before you visit us since the schedule can change day to day. We can always be reached via email at geog-advice@umd.edu or voice mail at 301-405-4073.

Opportunities
Fieldwork Opportunities
GEOG418 (Summer/Fall): Field and Laboratory Techniques in Environmental Science

Applied introduction to field methods. This class is built around a two week field trip (mid-August) with a base camp in the headwaters of the Potomac River in the mountains of West Virginia. During the camp the following topics are covers: GPS (global positions system), stream hydrology measurements, vegetation classification and ordination, micrometeorlogical measurements, soils, water quality, remote sensing and GIS, local environmental issues, geomophology and paleohistory, and natural and cultural history.

GEOG330 Beijing, China (Summer): Society and Sustainability
Sustainability is a 21st century buzzword and its definition varies across sectors, scales, and regions. Though all countries share a role in ensuring a sustainable future, given their large populations, GDP, and rates of resource consumption, the United States and China are the most critical actors in this narrative. Join this study abroad program in Beijing, China, to learn about the country’s sustainability initiatives through field visits, lectures, professional presentations, and group work with Beijing Normal University college students. You will examine why environmental change
superior scholarship and therefore it is an honor and a professional distinction.

Members must be in their 4th semester of study, working towards a Geographical Sciences or related degree, have a minimum 3.3 GPA cumulative and in all Geographical Sciences classes and attend meetings and events.

https://geog.umd.edu/undergraduate/associations (https://geog.umd.edu/undergraduate/associations/)

The Association of American Geographers
The Association of American Geographers (AAG) is a nonprofit scientific and educational society founded in 1904. For 100 years the AAG has contributed to the advancement of geography. Its members from more than 60 countries share interests in the theory, methods, and practice of geography, which they cultivate through the AAG’s Annual Meeting, two scholarly journals (Annals of the Association of American Geographers and The Professional Geographer), and the monthly AAG Newsletter. http://www.aag.org/

The Sustainability Club
The Department of Geographical Sciences’ sustainability club, otherwise known as the Geography Sustainability Task Force (GSTF), seeks to improve the efficiency of our consumption and improve working conditions while at the same time reducing our environmental footprint. We have made small strides such as changing paper usage and reducing power consumption in computer labs, but continue to work on large issues of departmental and building-wide lighting, water, and waste. Through increased education, awareness, and involvement we look forward to big changes in 2012 and beyond. The GSTF has, and continues to, consult and work with the University of Maryland Office of Sustainability (www.sustainability.umd.edu (http://www.sustainability.umd.edu)). Future meetings will be posted here and announced through internal departmental emails.

Scholarships and Financial Assistance
The Office of Student Financial Aid (OSFA) administers all types of federal, state and institutional financial assistance programs and, in cooperation with other university offices, participates in the awarding of scholarships to deserving students. For information, visit: www.financialaid.umd.edu (http://www.financialaid.umd.edu)

Awards and Recognition
• James R. Anderson Award For Undergraduate Excellence
• Robert A. Harper Award for Outstanding Undergraduate Research and Writing
• Undergraduate Research Symposium Award
• Outstanding Undergraduate Teaching Assistant Award

ACADEMIC PROGRAMS AND DEPARTMENTAL FACILITIES
The Geographical Science Department has two 25-seat computer teaching laboratories that are used in undergraduate coursework, particularly in GIS/Remote Sensing courses. There are different types of equipment for field research and remote sensing, and Global Positioning Systems (GPS) are also available.
