PALEOBIOLOGY MINOR (BSCI)

Program Director: John Merck, Ph.D.

The minor in Paleobiology will provide students with a broad understanding of the application of the methods of biology and geology to the study of the history of life, and develop students’ appreciation of how issues in the study of paleobiology connect with larger trends in those sciences. It is intended for all students with an interest in the study of the history of life, be it professional or avocational.

Requirements

Depending on optional course(s) taken, a total of 21 – 24 credits are required (see prerequisites (p. 1)). All courses presented for the minor must be passed with a grade of C- or better.

One of the following:

- BSCI207 Principles of Biology III - Organismal Biology
- BSCI222 Principles of Genetics

Upper-Level Paleobiology

One of the following:

- BSCI333 Principles of Paleontology
- GEOL331 Principles of Paleontology (cross-listed)
- BSCI392 Biology of Extinct Animals
- BSCI393 Biology of Extinct Animals Laboratory

Electives

Two courses (one from Biology and one from Geology) selected from the following:

- BSCI333 Principles of Paleontology (if not taken to satisfy the requirement above)
- BSCI34 Mammalogy
- BSCI361 Principles of Ecology
- BSCI363 The Biology of Conservation and Extinction
- BSCI392 Biology of Extinct Animals
- & BSCI393 Biology of Extinct Animals Laboratory (if not taken to satisfy the requirement above)
- BSCI370 Principles of Evolution
- BSCI399 Biology Department Research
- GEOL342 Sedimentation and Stratigraphy
- GEOL431 Vertebrate Paleobiology
- GEOL436 Principles of Biogeochemistry
- GEOL437 Global Climate Change: Past and Present
- GEOL499 Special Problems in Geology

Or another appropriate biology or geology course approved in advance by the Entomology or Geology advisor

Total Credits: 21-24

1 The Paleobiology Minor requires 3 cumulative credits of BSCI399 to count as elective. Research topic must be approved by GEOL or ENTM advisor.

Prerequisites

Required Courses

The following required courses have prerequisites (as indicated in the course description):

- BSCI207 Principles of Biology III - Organismal Biology
- BSCI222 Principles of Genetics
- GEOL102 Historical Geology
- BSCI333 Principles of Paleontology or GEOL331 (cross-listed)
- BSCI392 Biology of Extinct Animals and BSCI393 (lab)

Of these, only BSCI207 and BSCI222 have supporting prerequisites not already required for the minor.

Optional Courses

The following optional courses have prerequisites (as indicated in the course description):

- BSCI333 Principles of Paleontology or GEOL331 (cross-listed)
- BSCI334 Mammalogy
- BSCI361 Principles of Ecology
- BSCI363 The Biology of Conservation and Extinction
- BSCI392 Biology of Extinct Animals and BSCI393 (lab)
- BSCI370 Principles of Evolution
- GEOL342 Sedimentation and Stratigraphy
- GEOL431 Vertebrate Paleobiology
- GEOL436 Principles of Biogeochemistry
- GEOL437 Global Climate Change: Past and Present

Of these, only BSCI334, BSCI361, GEOL342, GEOL436, and GEOL437 have supporting prerequisites not already required for the minor.
