PALEOBIOLOGY MINOR (ENTM)

Program Director: John Merck, Ph.D.

The minor in Paleobiology will provide students with a broad understanding of the application of the methods of biology and geology to the study of the history of life, and develop students' appreciation of how issues in the study of paleobiology connect with larger trends in those sciences. It is intended for all students with an interest in the study of the history of life, be it professional or avocational.

REQUIREMENTS

Depending on optional course(s) taken, a total of 21 - 24 credits are required (see prerequisites (p. 1)). All courses presented for the minor must be passed with a grade of C- or better.

С	ourse	Title Cre	dits	
Fundamental Courses				
B\$ &	SCI160 BSCI161	Principles of Ecology and Evolution and Principles of Ecology and Evolution Lab	4	
0	ne of the followi	ng:	4	
	GEOL100 & GEOL110	Physical Geology and Physical Geology Laboratory		
	GEOL120 & GEOL110	Environmental Geology and Physical Geology Laboratory		
Introductory Life History or Organismal Biology				
One of the following:				
	GEOL102	Historical Geology		
	GEOL104	Dinosaurs: A Natural History		
	GEOL204	Dinosaurs, Early Humans, Ancestors, and Evolution; The Fossil Record of Vanished Worlds of the Prehistoric Past	F	
	BSCI207	Principles of Biology III - Organismal Biology		
	BSCI222	Principles of Genetics		
Upper-Level Paleobiology				
One of the following:				
	BSCI333/ GEOL331	Principles of Paleontology		
	BSCI392	Biology of Extinct Animals		
	& BSCI393	and Biology of Extinct Animals Laboratory		
Electives				
Two courses (one from Biology and one from Geology) selected from the following:			6-8	
	BSCI333/ GEOL331	Principles of Paleontology (if not taken to satisfy the requirement above)		
	BSCI334	Mammalogy		
	BSCI361	Principles of Ecology		
	BSCI363	The Biology of Conservation and Extinction		
	BSCI392 & BSCI393	Biology of Extinct Animals and Biology of Extinct Animals Laboratory (if not taken to satisfy the requirement above)		
	BSCI370	Principles of Evolution		
	BSCI399	Biology Department Research ¹		
	GEOL342	Sedimentation and Stratigraphy		

GEOL431	Vertebrate Paleobiology	
GEOL436	Principles of Biogeochemistry	
GEOL437	Global Climate Change: Past and Present	
GEOL499	Special Problems in Geology	
Or another appropriate biology or geology course approved in advance by the Entomology or Geology advisor		

Total Credits

21-24

The Paleobiology Minor requires 3 cumulative credits of BSCI399 to count as elective. Research topic must be approved by GEOL or ENTM advisor.

Prerequisites

Required Courses

The following required courses have prerequisites (as indicated in the course description):

- BSCI207 Principles of Biology III Organismal Biology
- BSCI222 Principles of Genetics
- GEOL102 Historical Geology
- · BSCI333 Principles of Paleontology or GEOL331 (cross-listed)
- BSCI392 Biology of Extinct Animals and BSCI393 (lab)

Of these, only BSCI207 and BSCI222 have supporting prerequisites not already required for the minor.

Optional Courses

The following optional courses have prerequisites (as indicated in the course description):

- BSCI333 Principles of Paleontology or GEOL331 (cross-listed)
- BSCI334 Mammalogy
- BSCI361 Principles of Ecology
- · BSCI363 The Biology of Conservation and Extinction
- BSCI392 Biology of Extinct Animals and BSCI393 (lab)
- · BSCI370 Principles of Evolution
- · GEOL342 Sedimentation and Stratigraphy
- GEOL431 Vertebrate Paleobiology
- · GEOL436 Principles of Biogeochemistry
- · GEOL437 Global Climate Change: Past and Present

Of these, only BSCI334, BSCI361, GEOL342, GEOL436, and GEOL437 have supporting prerequisites not already required for the minor.

ADVISING

Advising is not mandatory for the Paleobiology Minor, however interested students are urged to consult with the Geology or Entomology Director of Undergraduate Studies prior to declaring the minor to discuss academic planning and logistics. Contact information is available at the Geology web page http://www.geol.umd.edu and the Entomology web page http:// entomology.umd.edu.
