The Department of Chemical and Biomolecular Engineering, established in 1937 at the University of Maryland, provides students with a fundamental understanding of physical, chemical and biological processes and the ability to apply molecular and biomolecular information and methods of discovery into products and the processes by which they are made. Our undergraduate and graduate programs provide the unique interdisciplinary academic foundation and scholarly training needed to address complex engineering problems with an emphasis on the advancing fields of biological engineering and nanotechnology. Our undergraduate program is ABET accredited. For more information on our accreditation, please follow this link.

**Programs**

**Major**
- Chemical and Biomolecular Engineering Major ([https://academiccatalog.umd.edu/undergraduate/colleges-schools/engineering/chemical-biomolecular-engineering/chemical-biomolecular-engineering-major](https://academiccatalog.umd.edu/undergraduate/colleges-schools/engineering/chemical-biomolecular-engineering/chemical-biomolecular-engineering-major))

**Advising**
All students choosing Chemical and Biomolecular Engineering as their primary field must see their assigned undergraduate Faculty Mentor and Advisor each semester. Please contact Kathy Gardinier (Lopresti) at 301-405-5888 or lopresti@umd.edu or Amanda Alicea at 301-405-1885 or aalicea@umd.edu for your assigned advisor information.

**Opportunities**

**UNDERGRADUATE RESEARCH EXPERIENCES**
A unique aspect of the Department's undergraduate program is its high level of students' participation in cutting-edge research. Approximately half of our students graduate with significant lab experience and most find it to be one of the high points of their undergraduate education.

**Honors Program**
The A. James Clark School of Engineering hosts a chapter of the Omega Chi Epsilon National Honor Society for chemical engineering, as well as a chapter of the engineering honor society, Tau Beta Pi.

**Student Societies and Professional Organizations**
Students operate a campus student chapter of the professional organization, the American Institute of Chemical Engineers. Omega Chi Epsilon is the honorary Chemical Engineering Society. OXE is our Honors Society.

**Scholarships and Financial Assistance**
Financial assistance based upon need is available through the Office of Student Financial Aid ([https://www.financialaid.umd.edu](https://www.financialaid.umd.edu)). A number of scholarships are available through the A. James Clark School of Engineering. The department offers opportunities for research and other part-time employment.

**Awards and Recognition**
Annual awards are given to recognize scholarship and outstanding service to the Department, College, and University.
