Program Educational Objectives

Broadly stated, the Program Educational Objectives (PEOs) for the undergraduate major in electrical engineering pertain to the accomplishments and performance of our students within a few years from graduation. These objectives are determined in consultation with the various constituencies of the electrical engineering program and agreed upon and approved by a consensus of the faculty.

Within a few years from graduation, a graduate of electrical engineering will have engaged in professional development, and will have attained any of the following program educational objectives:

1. Achieve advanced technical expertise and/or advance to a leadership position in industry or government
2. Earn a graduate degree from a respected graduate program in computer engineering, electrical engineering, or related field
3. Become an innovator and/or entrepreneur in computer engineering, electrical engineering, or related space
4. Use their professional knowledge, skills and abilities, as well as their sense of ethical responsibility, to make a positive impact on societal and environmental concerns and/or to improve the climate for diversity, equity and inclusiveness within the profession

Student Learning Outcomes

A comprehensive set of Student Learning Outcomes (SLOs) has been derived from the Program Educational Objectives (PEOs). These SLOs comprise the knowledge and skills all Electrical Engineering students are expected to possess by the time they graduate so the PEOs can be accomplished. The SLOs are:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Requirements

Requirements for the Electrical Engineering major include thorough preparation in mathematics, physics, chemistry, and engineering science. Elective courses must include both Electrical Engineering courses and technical courses outside the department. Students must earn a grade of "C-" or higher in all engineering, mathematics, and science courses, as well as the prerequisites for these courses. A sample program is shown below.
Effective Fall 2008, all entering BSEE students must:

**TECHNICAL ELECTIVE REQUIREMENTS**

<table>
<thead>
<tr>
<th>Junior Year</th>

<tr>
<td>General Education</td>
<td>3</td>
<td>General Education</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Credits 126**

1. ENEE101 and ENES100 cannot be taken in the same semester. Students may take these courses consecutively within their first year in the order of choice.
2. Students must complete ENEE140 or pass the exemption exam or AP CS exam before taking ENEE150.
3. Note: Please see www.4yearplans.umd.edu (http://www.4yearplans.umd.edu).
4. Must come from list of courses approved for general technical electives with at least two elective EE courses taken from the same specialty area.
5. Must come from list of approved Math courses within general technical elective list.

**TECHNICAL ELECTIVE REQUIREMENTS**

*Effective Fall 2008, all entering BSEE students must:*

1. Distribute their 13 credits of EE technical electives among the following course categories:

<table>
<thead>
<tr>
<th>Category</th>
<th>Electives</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Category A</td>
<td>Advanced Theory and Applications</td>
<td>minimum of 3 credits</td>
</tr>
<tr>
<td>Category B</td>
<td>Advanced Laboratory</td>
<td>minimum of 2 credits</td>
</tr>
<tr>
<td>Category C</td>
<td>Capstone Design</td>
<td>minimum of 3 credits</td>
</tr>
</tbody>
</table>

Note: ENEE499, Senior Projects in Electrical and Computer Engineering, may be used to satisfy either the Category A or the Category B requirement subject to approval by the faculty supervisor and the Associate Chair; it cannot be used as a Category C course. The maximum number of ENEE499 credits that may be applied towards EE technical elective requirements is five, except for students in the departmental honors program, who may take up to six credits.

2. Distribute their 9 credits of general technical electives as follows:
   a. They may be any upper-level course (300 level or higher) from the math, engineering, and basic science disciplines whose courses
   start with the following prefixes and who do not appear on the list of unacceptable courses available from the Undergraduate Studies Office: AMSC, BCHM, BIOE, BSCI, CHEM, CMSC, ENAE, ENCE, ENCH, ENEE, ENES, ENFP, ENMA, ENME, ENNU, ENRE, MATH, PHYS, and STAT. The most up-to-date list of approved and unacceptable courses will always be available from the Undergraduate Studies Office and on the ECE website.
   b. They may be any upper-level course (300 level or higher) whose prefix is not given in the list above, assuming that the student:
      i. completes the application to allow the course to count as a general elective,
      ii. demonstrates how this course complements the student’s professional goals, and
      iii. receives the signed approval of the Associate Chair for Undergraduate Education. If more than one course is taken via this option, all of those courses must have a closely-related theme.
3. Have two courses from the same ENEE specialty area. A list of courses grouped according to specialty area is available from the Undergraduate Studies Office and on the ECE website.

If you have any questions about how these requirements affect your current selection of senior EE electives, please contact an advisor.

**Technical electives for students admitted Spring 2001 - Spring 2008:**

The 13 credits of EE technical electives among the following course categories:

<table>
<thead>
<tr>
<th>Category</th>
<th>Electives</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Category A</td>
<td>Advanced Theory and Applications</td>
<td>minimum of 3</td>
</tr>
<tr>
<td>Category B</td>
<td>Advanced Laboratory</td>
<td>minimum of 2</td>
</tr>
<tr>
<td>Category C</td>
<td>Capstone Design</td>
<td>minimum of 3</td>
</tr>
</tbody>
</table>

Please read carefully, and make a note of, the following special cases and other items:

1. Two credits of ENEE499, Senior Projects in Electrical and Computer Engineering, may be used to satisfy the Advanced Laboratory requirement subject to approval by the faculty supervisor and the Associate Chair. The maximum number of ENEE499 credits that may be applied towards EE technical elective requirements is five.
2. Additional Capstone Design courses can be used as substitutes for:
   - the required Advanced Theory and Applications course; and/or
   - the required Advanced Laboratory course, provided one of the following is completed: ENEE408A, ENEE408B, ENEE408C, or ENEE408F.
3. Completion of ENEE408A and ENEE469A satisfies both the Capstone Design and Advanced Laboratory requirements.
4. If you have any questions on how these requirements affect your current selection of senior EE electives, please contact an advisor.

**FOUR-YEAR PLAN**
