INTERNATIONAL ENGINEERING MINOR

A.James Clark School of Engineering (ENGR)
1131 Glenn L Martin Hall, 301-405-0234
www.ilp.umd.edu

In addition to a strong engineering background, there is a need for engineers with cross-cultural experience and foreign language abilities. Students may earn the minor by completing a course in International Business Cultures for Engineering and Technology, a Global Perspectives elective, and additional courses in language, culture studies, or internationally related studies, plus an engineering experience abroad. Contact the minor advisor, Jane Fines (jfines@umd.edu) or visit the web at www.ilp.umd.edu for more information. Students who fulfill minor requirements will receive a notation on their official transcript.
