PUBLIC HEALTH SCIENCE MAJOR

School of Public Health
Room 2387
301- 405-5436
phsc@umd.edu
https://sph.umd.edu/degrees/bachelor-science-public-health-science-college-park

The Public Health Science program includes a strong curriculum in science and public health courses, such as biostatistics, epidemiology, environmental health, and global health. Students will have the opportunity for individual exploration in public health through electives, laboratory experiences, optional internships, and a culminating interdisciplinary capstone course. As a collaborative degree involving multiple scholarly disciplines, courses offered by this program may be found under the following acronyms: PHSC, SPHL, HLTH, KNES, EPIB, MIEH and HLSA.

The degree effectively prepares students to pursue exciting careers in allied health, medical, and public health fields as well as post-baccalaureate professional and academic degrees.

The degree is offered at both the College Park and Shady Grove campuses.

Program Objectives
The Public Health Science Bachelor of Science degree is an interdisciplinary program designed to provide students with the educational foundation required to effectively address local, national and global issues within the public health arena.

Program Learning Outcomes
1. Discuss the history and philosophy of public health as well as its core values, concepts, and functions across the globe and in society.
2. Use basic public health concepts, methods, and tools for data collection and analysis.
3. Identify the major health-related needs and concerns of populations and formulate basic processes, approaches, and interventions as possible solutions.
4. Describe the underlying science of human health and disease including opportunities for promoting and protecting health across the lifespan.
5. Examine the socio-economic, behavioral, biological, environmental and other factors that impact human health and contribute to health disparities.
6. Demonstrate the fundamental concepts and features of project implementation, including planning, assessment, and evaluation.
7. Compare and contrast the fundamental characteristics and organizational structures of the health systems of the United States and other countries.
8. Characterize the basic concepts of legal, ethical, economic, and regulatory dimensions of health care and public policy.
9. Illustrate the basic concepts of public health specific writing and communication.
10. Interpret and synthesize scientific knowledge to propose evidence-based approaches and solutions to public health problems.

Requirements
In order to graduate with a Bachelor of Science degree in Public Health Science, students must complete 120 credits, 74 of which are specific to the Public Health Science degree. Students must earn a minimum grade of C- or higher in all Public Health Science major-required coursework.

Course Title Credits
Scientific Foundation Courses
MATH120 Elementary Calculus I 3
BSCI170 Principles of Molecular & Cellular Biology 4
BSCI171 and Principles of Molecular & Cellular Biology Laboratory 4
BSCI201 Human Anatomy and Physiology I 4
BSCI202 Human Anatomy and Physiology II 4
CHEM131 Chemistry I - Fundamentals of General Chemistry 4
CHEM132 and General Chemistry I Laboratory 4
CHEM231 Organic Chemistry I 4
CHEM232 and Organic Chemistry Laboratory I 4
PHSC222 Principles of Genetics 4
PHSC223 General Microbiology 4

Public Health Science Foundation Courses
SPHL100 Foundations of Public Health 3
HLTH366 Behavioral and Community Issues in Public Health 3
EPIB301 Epidemiology for Public Health Practice 3
EPIB315 Biostatistics for Public Health Practice 3
HLSA300 Introduction to Health Policy and Services 3
MIEH300 A Public Health Perspective: Introduction to Environmental Health 3
MIEH400 Introduction to Global Health 3
KNES320 Physiological Basis of Physical Activity and Human Health 4
PHSC415 Essentials of Public Health Biology: The Cell, The Individual, and Disease 3
PHSC497 Public Health Science Capstone 3

Public Health Science Options Courses 1 12

Total Credits 74

1 The Public Health Science option courses build upon the Scientific and Public Health Science Foundation courses. The option courses are 300 and 400 level courses primarily offered within the School of Public Health. By choosing from these courses, students have an opportunity to customize their program. Students are encouraged to choose courses that best align with a particular career goal. Please visit the PHSC website for the current list of approved options. https://sph.umd.edu/department/phs/college-park-curriculum-post-spring-2018

Four Year Plan
