CYBER-PHYSICAL SYSTEMS ENGINEERING MAJOR AT SHADY GROVE

Program Director: Romel Gomez, Ph.D.

The Bachelor of Science in Cyber-Physical Systems Engineering will provide students with a solid foundation in key emerging technologies of the Internet of Things (IoT), the ability to integrate devices into complete IoT systems, and an understanding of how IoT fits within the wider context of information and communications technology, including data analytics and cloud computing. At the senior level, students will ultimately be able to specialize in one of the following tracks: Hardware, Computation, or Security track or pursue a General track option that provides a focus on courses from the other three tracks. It is expected that graduates will be in high demand in such occupational areas as hardware/software developers, computer systems analysts, network architects and administrators, information security analysts, information systems analysts and computer programs.

Admission to the Major

As an undergraduate program within the A. James Clark School of Engineering, the Cyber-Physical Systems Engineering major is a Limited Enrollment Program (LEP). Admission to this program will follow the School of Engineering’s admissions criteria found on the LEP website: http://lep.umd.edu.

Beyond the LEP gateway criteria, students will need to fulfill the following requirements to gain admission to the Cyber-Physical Systems Engineering major:

- Completion of all first and second year required major courses with a minimum grade of a "C-.”
- Completion of all lower-level University General Education requirements.
- Completion of 60 credits.

A minimum grade point average of 3.0 in all courses taken at the University of Maryland and all other institutions is required for internal and external transfer students.

Due to the similarity in curriculum content and the physical location of course offerings, students in the Electrical Engineering, Computer Engineering, and Computer Science programs at UMD will not be eligible to add Cyber-Physical Systems Engineering as a second major or degree.

This program is mainly intended for students transferring from a Maryland public community college. While students at the College Park campus can pursue the program, they will not be able to seek admission into the School of Engineering and the Cyber-Physical Systems Engineering major until they have completed the Engineering LEP gateway courses, required first and second year major courses, lower-level General Education requirements, and have earned at least 60 credits. The junior and senior years would take place at the Shady Grove campus.

Program Education Objectives

The program education objective of this program is to produce a well-trained workforce in the emerging technologies of internet of things. The Bachelor of Science in Cyber-Physical Systems Engineering will produce engineering graduates who:

- Use their hardware and software engineering design training and problem-solving skills to contribute professionally in an industrial, research and applications environment;
- Demonstrate initiative, leadership, teamwork, and continued professional development;
- Demonstrate understanding of the impact of their professional activities on society.

Student Learning Outcomes

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. The ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments that must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

REQUIREMENTS

First & Second Year

Prior to being admitted to the Cyber-Physical Systems Engineering major, students should have completed the Engineering LEP gateway courses, basic math/science courses, lower-level General Education requirements, and at least 60 credits.

### Mathematical Requirements

**MATH240**  
Introduction to Linear Algebra

---

### General Education Requirements/Additional Electives

28-31

---

1. Any of the following programming courses or their equivalents will be accepted:
   - ENEE140
   - CMSC131
   - CMSC106
   - Any introductory course in C, C++, Java, or Python (student must submit the course to ECE Department for Evaluation)

---

### Junior & Senior Year at Shady Grove

#### Junior Year

</tr>
</tbody>
</table>

**Elective Courses**

Select three of the following:

- ENEB443  
  Hardware/Software Security for Embedded Systems
- ENEB451  
  Network Security
- ENEB452  
  Advanced Software for Connected Embedded Systems
- ENEB453  
  Web-Based Application Development (Web Based Application Development)
- ENEB455  
  Advanced FPGA System Design using Verilog for Embedded Systems
- ENEB457  
  Foundations of Databases for Web Applications

**Total Credits: 12**

#### Security Track

<table>

**Elective Courses**

Select three of the following:

- ENEB443  
  Hardware/Software Security for Embedded Systems
- ENEB452  
  Advanced Software for Connected Embedded Systems
- ENEB453  
  Web-Based Application Development
- ENEB455  
  Advanced FPGA System Design using Verilog for Embedded Systems
- ENEB456  
  Machine Learning Tools (Machine Learning Tools)
- ENEB457  
  Foundations of Databases for Web Applications

**Total Credits: 12**

#### General Track

The General Track offers a general focus of course content with classes from each of the three tracks. While there are no specific required or elective courses for this track, the General Track requires 12 credits, which is the same as the other three tracks. Consult with an advisor for details.

**Total Credits: 12**

#### Additional Information

- **FOUR-YEAR PLAN**
  Click here [https://eng.umd.edu/advising/four-year-plans/] for roadmaps for four-year plans in the A. James Clark School of Engineering.

- Additional information on developing a four-year academic plan can be found on the following pages:
