EMBEDDED SYSTEMS AND INTERNET OF THINGS MAJOR AT SHADY GROVE

Program Director: Romel Gomez, Ph.D.

The Bachelor of Science in Embedded Systems and Internet of Things will provide students with a solid foundation in key emerging technologies of the Internet of Things (IoT), the ability to integrate devices into complete IoT systems, and an understanding of how IoT fits within the wider context of information and communications technology, including data analytics and cloud computing. At the senior level, students will ultimately be able to specialize in one of the following tracks: Hardware, Computation, or Security track or pursue a General track option that provides a focus on courses from the other three tracks. It is expected that graduates will be in high demand in such occupational areas as hardware/software developers, computer systems analysts, network architects and administrators, information security analysts, information systems analysts and computer programs.

Admission to the Major

As an undergraduate program within the A. James Clark School of Engineering, the Embedded Systems major is a Limited Enrollment Program (LEP). Admission to this program will follow the School of Engineering’s admissions criteria found on the LEP website: lep.umd.edu (http://lep.umd.edu).

Beyond the LEP gateway criteria, students will need to fulfill the following requirements to gain admission to the Embedded Systems major:

- Completion of all first and second year required major courses with a minimum grade of a "C-".
- Completion of all lower-level University General Education requirements.
- Completion of 60 credits.

A minimum grade point average of 3.0 in all courses taken at the University of Maryland and all other institutions is required for internal and external transfer students.

Due to the similarity in curriculum content and the physical location of course offerings, students in the Electrical Engineering, Computer Engineering, and Computer Science programs at UMD will not be eligible to add Embedded Systems as a second major or degree.

This program is mainly intended for students transferring from a Maryland public community college. While students at the College Park campus can pursue the program, they will not be able to seek admission into the School of Engineering and the Embedded Systems major until they have completed the Engineering LEP gateway courses, required first and second year major courses, lower-level General Education requirements, and have earned at least 60 credits. The junior and senior years would take place at the Shady Grove campus.

Program Objectives

The program education objective of this program is to produce a well-trained workforce in the emerging technologies of internet of things. The Bachelor of Science in Embedded Systems and Internet of Things will produce engineering graduates who:

- Use their hardware and software engineering design training and problem-solving skills to contribute professionally in an industrial, research and applications environment;
- Demonstrate initiative, leadership, teamwork, and continued professional development;
- Demonstrate understanding of the impact of their professional activities on society.

Program Learning Outcomes

1. An ability to apply knowledge of computing, engineering, science, and mathematics to identify, analyze and solve complex engineering problems.
2. An ability to design, implement, and evaluate a computer-based system, process, component, or program that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An understanding of professional, ethical, legal, security, and social issues and responsibilities.
5. An ability to analyze the local and global impact of computing on individuals, organizations, and society.
6. An ability to function effectively on teams to accomplish a common goal.
7. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
8. An ability to acquire and apply new knowledge, using appropriate learning strategies.

Requirements

First & Second Year

Prior to being admitted to the Embedded Systems and Internet of Things major, students should have completed the Engineering LEP gateway courses, basic math/science courses, lower-level General Education requirements, and at least 60 credits.

Programming Requirement \(^1\) \(2\-4\)  
ENES100  Introduction to Engineering Design  \(3\)  
One of the following MATH2xx courses: \(3\-4\)  
MATH246  Differential Equations for Scientists and Engineers  
MATH241  Calculus III
MATH240 Introduction to Linear Algebra

General Education Requirements/Additional Electives 28-31

1 Embedded systems will accept any of the following programming courses or their equivalents:
   • ENEE140
   • CMSC131
   • CMSC106
   • Any introductory course in C, C++, Java, or Python (student must submit the course to ECE Department for Evaluation)

Junior & Senior Year at Shady Grove

Junior Year

First Semester | Credits | Second Semester | Credits
---|---|---|---
ENEB302 | 4 | ENEB304 | 3
ENEB344 | 4 | ENEB352 | 3
ENEB354 | 3 | ENEB353 | 3
ENEB340 | 3 | ENEB355 | 3
ENEB341 | 3 | ENEB345 | 3
Total Credits 17

Senior Year

First Semester | Credits | Second Semester | Credits
---|---|---|---
ENEB408 (ENEB408A Capstone Design I) | 3 | ENEB408 (ENEB408B Capstone Design II) | 3
ENEB454 | 3 Senior Level Electives (based on track) | 12

Total Credits 12

General Track

The General Track offers a general focus of course content with classes from each of the three tracks. While there are no specific required or elective courses for this track, the General Track requires 12 credits, which is the same as the other three tracks. Consult with an advisor for details.

Four Year Plan

Click here (https://eng.umd.edu/advising/four-year-plans/) for roadmaps for four-year plans in the A. James Clark School of Engineering.

Additional information on developing a four-year academic plan can be found on the following pages:
