undergraduate-degrees/bs-public-health-science-shady-grove/)

Program Director: Jennifer Hodgson, Ed.D., MPH

The Public Health Science program includes a strong curriculum in
science and public health courses, such as biostatistics, epidemiology,
environmental health, and health policy. Students will have
the opportunity for individual exploration in public health through electives,
laboratory experiences, optional internships, and a culminating
interdisciplinary capstone course. As a collaborative degree involving
multiple scholarly disciplines, courses offered by this program may be
found under the following acronyms: PHSC, SPHL, HLTH, KNES, EPIB,
MIEH and HLSA.

The degree effectively prepares students to pursue exciting careers in
allied health, medical, and public health fields as well as post-
baccalaureate professional and academic degrees.

The degree is offered at both the College Park and Shady Grove
campuses.

Program Objectives

The Public Health Science Bachelor of Science degree is an
interdisciplinary program designed to provide students with the
educational foundation required to effectively address local, national and
global issues within the public health arena.

Program Learning Outcomes

1. Discuss the history and philosophy of public health as well as its core
   values, concepts, and functions across the globe and in society.
2. Use basic public health concepts, methods, and tools for data
   collection and analysis.
3. Identify the major health-related needs and concerns of populations
   and formulate basic processes, approaches, and interventions as
   possible solutions.
4. Describe the underlying science of human health and disease
   including opportunities for promoting and protecting health across the
   lifespan.
5. Examine the socio-economic, behavioral, biological, environmental,
   and other factors that impact human health and contribute to health
   disparities.
6. Demonstrate the fundamental concepts and features of project
   implementation, including planning, assessment, and evaluation.
7. Compare and contrast the fundamental characteristics and
   organizational structures of the health systems of the United States
   and other countries.
8. Characterize the basic concepts of legal, ethical, economic, and
   regulatory dimensions of health care and public policy.
9. Illustrate the basic concepts of public health-specific writing and
   communication.
10. Interpret and synthesize scientific knowledge to propose evidence-
    based approaches and solutions to public health problems.
11. Critically analyze the impact racism has on public health and reflect
    on what it means to be anti-racist.

REQUIREMENTS

For full details of degree requirements, please view the Shady Grove
curriculum online at: http://sph.umd.edu/department/phssg/shady-
grove-curriculum (http://sph.umd.edu/department/phssg/shady-grove-
curriculum/).

In order to graduate with a Bachelor of Science degree in Public Health
Science, students must complete 120 credits, 74 of which are specific to
the Public Health Science degree. Students must earn a minimum grade
of C- or higher in all Public Health Science major-required coursework.

Public Health Science Options Courses 1

Total Credits 74

1 The Public Health Science option courses build upon the Scientific and Public Health Science Foundation courses. The option courses are 300 and 400 level courses primarily offered within the School of Public Health. By choosing from these courses, students have an opportunity to customize their program. Students are encouraged
to choose courses that best align with a particular career goal. Please visit the PHSC website for the current list of approved options: https://sph.umd.edu/department/phs/college-park-curriculum-post-spring-2018 (https://sph.umd.edu/department/phs/college-park-curriculum-post-spring-2018/)

FOUR-YEAR PLAN

Click here (http://sph.umd.edu/content/four-year-plans/) for roadmaps for four-year plans in the School of Public Health.

Additional information on developing a four-year academic plan can be found on the following pages:

• http://4yearplans.umd.edu
• the Student Academic Success-Degree Completion Policy (https://academiccatalog.umd.edu/undergraduate/registration-academic-requirements-regulations/academic-advising/#success) section of this catalog

ADVISING

Major academic advising is mandatory for Public Health Science students at Shady Grove each semester. Academic advising is by appointment only and can be scheduled on our website (https://sph.umd.edu/academics/departments-units/public-health-science/shady-grove-public-health-science/advising-public-health-science-shady-grove/).
